PROFESSIONAL SUMMARY

CompTIA Security+ certified cybersecurity graduate (B.S., Summa Cum Laude, 3.96 GPA) seeking a junior Security Operations Center (SOC), security operations, or vulnerability management role. Public projects you can clone: a log anomaly detector, a local vulnerability-assessment app, and a MITRE ATT&CK mapping benchmark. Eight years in federally regulated aviation operations built habits that carry into SOC work: accurate incident records, access-control discipline, and calm escalation under time pressure.

TECHNICAL SKILLS

Security operations: Alert triage · log analysis · authentication and DNS investigation · incident documentation · escalation notes · vulnerability assessment

Frameworks: MITRE ATT&CK · NIST SP 800-61 incident handling · least privilege and access control

Tools and languages: Python (pandas, NumPy, pytest) · TypeScript · Bash · PowerShell · Nmap · Flask · SQLite · Git/GitHub

Certifications: CompTIA Security+ ce (SY0-701), issued Jan 2025, valid through Jan 2028

SELECTED PROJECTS

Security Log Anomaly Detection — Python, pandas, NumPy · github.com/KM-it-ops/security-log-anomaly-detection

- Detects brute-force logins, port scans, off-hours sensitive access, unknown IPs, and privilege escalation in seven days of synthetic logs (about 700 events), plus statistical volume spikes.
- Outputs severity-ranked alerts with a timeline and checks them against the attacks planted in the test data.

SniffOutPro — TypeScript, Tauri desktop, Nmap · github.com/KM-it-ops/Sniffoutpro

- Desktop app for authorized vulnerability assessment of your own computer: local scan with no account, using a safe lab sample or Nmap against permitted targets. Never exploits a target.
- CI requires 80% test coverage of scan-engine branches before merging. Work in progress.

ATT&CKLens Benchmark — Python, MITRE ATT&CK · github.com/KM-it-ops/AgentForge-ATT-CKLens-Benchmark

- Scores AI agents on mapping evidence to ATT&CK techniques, citing evidence, admitting "no clear mapping," suggesting detections, and resisting prompt injection; seven agents scored on one rubric with a final report.

PROFESSIONAL EXPERIENCE

Aviation Security Operations Crew Chief — American Airlines · Charlotte, NC · 2015 – 2023

- Led crews in a federally regulated environment (CBP badge endorsement) supporting international flights, where identity checks, access control, and accurate records were mandatory.
- Coordinated with management during time-sensitive incidents, inspections, and compliance checks; completed recurring incident-response and safety/security training.
- Wrote clear escalation notes and kept a chain-of-custody mindset for evidence and process.

Additional operations experience — USPS (Courier and Logistics Specialist, Kannapolis, NC, 2024 – 2025); Fossa Logistics LLC / Amazon DSP (Delivery Associate, Charlotte, NC, 2025 – Present)

- Schedule-driven, high-volume work requiring reliability and independent problem-solving while completing my cybersecurity degree.

EDUCATION

B.S. Information Technologies, Cybersecurity Concentration — Southern New Hampshire University

Completed Dec 2025 · Summa Cum Laude · 3.96 GPA · Alpha Sigma Lambda honor society
