

MAHMOUD ("MICHAEL") AL KURDI

Charlotte, NC · Open to remote · (704) 456-8322 · kurdi.michael.it@gmail.com
linkedin.com/in/mahmoud-michael-al-kurdi · github.com/KM-it-ops · km-it-ops.github.io

PROFESSIONAL SUMMARY

Security+ certified cybersecurity graduate (Summa Cum Laude, 3.96 GPA) targeting Tier-1 SOC, security operations, and junior detection roles. Hands-on portfolio in log-based anomaly triage, MITRE ATT&CK-aligned analysis, vulnerability workflow tooling, and defensive automation with reproducible tests and documentation. Eight years in federally regulated aviation operations built habits that transfer to SOC work: accurate incident documentation, identity/access discipline, escalation under time pressure, and procedural accountability.

TECHNICAL SKILLS

SOC / Defensive Ops: Alert triage · log analysis · authentication & DNS investigation · incident documentation · evidence review · escalation notes · vulnerability awareness · remediation planning

Frameworks & Concepts: MITRE ATT&CK · defensive security · least privilege / access control · security documentation · detection ideas & follow-up questions

Automation & Scripting: Python · Bash · PowerShell · pandas / NumPy · pytest · Git/GitHub · JSON / YAML / Markdown

Web & Tools: JavaScript · Node.js · Flask · Gradio · HTML/CSS · npm

Certifications: CompTIA Security+ ce (SY0-701) — issued Jan 2025, valid through Jan 2028

SELECTED PROJECTS

Security Log Anomaly Detection System — Python, pandas, NumPy · github.com/KM-it-ops/security-log-anomaly-detection

- Built SOC-style authentication and network anomaly triage on synthetic logs (7 days, ~700+ events) with rule-based detectors (brute force, port scan, off-hours sensitive access, unknown IP, privilege escalation) and statistical volume spikes.
- Produced analyst-facing output focused on investigation cues (what fired, why it matters) rather than opaque model scores.

AgentForge ATT&CKLens Benchmark — MITRE ATT&CK, Gradio, Python · github.com/KM-it-ops/AgentForge-ATT-CKLens-Benchmark

- Designed a defensive benchmark for ATT&CK mapping discipline, evidence citation, uncertainty handling ("no clear mapping"), detection ideas, remediation guidance, and analyst follow-ups.
- Evaluated 7 agent artifacts with rubric-based scorecards; preserved reproducibility via scripts, raw outputs, logs, acceptance tests, and a final report.
- Built-in prompt-injection resistance and safety rules so outputs stay within defensive-security constraints.

Vulnerability Management Mini Program — Python, Flask, SQLite · github.com/KM-it-ops/Vulnerability-Management-Mini-Program

- Built a dashboard-style vuln workflow (CRUD, severity states, search/filter, KPI cards) aligned to analyst intake and status tracking.
- Modeled REST-style operational views so findings move from discovery to prioritization to remediation tracking.

PROFESSIONAL EXPERIENCE

Aviation Security Operations Crew Chief — American Airlines · Charlotte, NC · 2015 – 2023

- Operated in a federally regulated environment (security clearance; CBP badge endorsement) supporting international flight ops where identity validation, access control, and documentation accuracy were non-negotiable.
- Coordinated with management and ops during time-sensitive incidents, inspections, and compliance workflows; completed recurrent incident-response and safety/security training.
- Practiced the same habits Tier-1 SOC expects: clear escalation notes, chain-of-custody mindset for evidence/process, and calm execution under SLA pressure.

Additional operations experience — USPS (Courier & Logistics Specialist, Kannapolis, NC, 2024 – 2025); Fossa Logistics LLC / Amazon DSP (Delivery Associate, Charlotte, NC, 2025 – Present)

- High-volume, schedule-driven delivery work reinforcing reliability, independent problem-solving, and documentation under tight SLAs while completing the cybersecurity degree.

EDUCATION

B.S. Information Technologies — Cybersecurity Concentration

Southern New Hampshire University · Completed Dec 2025; diploma conferred Jan 1, 2026

Summa Cum Laude · 3.96 GPA · Sigma Psi chapter, Alpha Sigma Lambda
